2026 thru 2027

## Capital Improvement Plan

Wabasha, MN

Project # 27-PW-02

Project Name 2027 Storm Sewer Maintenance

Total Project Cost \$10,000

Department Public Works

Type Unassigned

Category Unassigned

Priority n/a

Status Active

### Description

2027 Storm Sewer Maintenance

### Justification

The allocation of \$10,000.00 in 2027 is a crucial investment in targeted, preventative infrastructure management. Approximately \$7,000 will be dedicated to mitigating drainage issues from a storm sewer on 12th Street. This proactive maintenance is significantly more cost-effective than reactive, emergency repairs, which could be triggered by street flooding or infrastructure damage. By addressing this known issue, the project enhances public safety by preventing hazardous conditions from standing water and helps protect the local environment by ensuring proper stormwater flow, which mitigates the impact of untreated runoff. The remaining \$3,000 will be used for the purchase of a new box culvert. This is a vital asset preservation effort, replacing a failing structure to prevent a potential major system failure. By investing in this replacement now, we can avoid a much larger and more costly emergency repair in the future, thus preserving the long-term value of the city's assets.

Expenditures	2026	2027	Total

Project #	27-AMB-01
Project Name	Ambulance Building

---

Total Project Cost	\$1,004,410	Contact	Ambulance Director
Department	Ambulance	Type	Improvement
Category	Buildings	Priority	n/a
Status	Active		

---

### Description

New Ambulance Hall

---

### Justification

We have outgrown our building and with the make up of the crew and the increased call volume changing our current building no longer meets the needs of how the service runs today. There is inadequate space for vehicles, supplies, training, and we have a lack of space for crew during their shifts. Change is necessary for continued operational efficiency.

## Capital Improvement Plan

Wabasha, MN

Project # 27-PW-03

Project Name Boat Launch Repairs

Total Project Cost \$135,000

Contact

Public Works Director

Department Public Works

Status

Active

### Description

Parkside Marina Boat Launch – Full Replacement

### Justification

The existing concrete slab has become severely undermined and cracked due to constant erosion from ever-changing water levels and frequent flash flooding and river flooding. This has created an unstable and hazardous surface, making the launch unsafe for both the public and boat traffic. Due to the rapid and severe deterioration, this is considered an emergency project that must be addressed within the next two years to prevent a potential collapse or serious injury. Per the current agreement with Parkside Marina, the city holds full responsibility for the maintenance and repair of the boat launch. To help offset the cost, staff is planning on applying for grant funding where available to lessen the financial burden on the city. The boat launch is a vital piece of public infrastructure, supporting recreational boating, fishing, and water-based tourism in our community.

## Capital Improvement Plan

Wabasha, MN

Project #	EM	Contact	Emergency Management Director
Project Name	Emergency Management	Category	Unassigned
Total Project Cost	\$20,000		
Department	Emergency Management		
Status	Active		

### Description

\$2,000 to be added yearly to a CIP "Emergency Management" Savings Account

### Justification

The past two years have shown us how quickly a flooding disaster can create significant financial strain, with bills piling up rapidly during the response and recovery phases. To date, our practice has been to rely on reserve funds, a strategy that is not sustainable.

Fortunately, we have an opportunity to change this. Approximately \$25,000.00 in leftover funds from the 2024 flood disaster (FEMA DR-4797) are currently designated for storage under the Capital Improvement Program (CIP). By reallocating these funds, we can establish a dedicated Disaster Preparedness and Response Fund.

This approach is a significant improvement over our current budgeting practice, which allocates a modest \$2,000 annually to the Emergency Management budget (E100-420-42400-387). While well-intentioned, this amount is insufficient to cover even the most basic costs of a disaster. In years without an event, the funds sit unused, in years with one, they are quickly exhausted, leaving us vulnerable and reactive.

We have been fortunate to receive reimbursement from the State of Minnesota and FEMA for recent events. However, this is never a guarantee, especially given the unpredictable nature of federal funding and policy changes. Preparing now is not just a strategic choice; it's a responsible one. A dedicated fund will ensure we are proactive, financially secure, and able to respond immediately to protect our community and its residents from future disasters.

Project #	MAINTENANCE
Project Name	Library Building Maintenance

---

Total Project Cost	\$60,000	Department	Library
Type	Unassigned	Category	Unassigned
Priority	n/a	Status	Active

---

### Description

Library Building Maintenance. This will be used for maintenance to the Library building.

---

### Justification

The main Library was built in 1968. Because this is an aging facility, it is important to have funds set aside for ongoing maintenance costs. For example, this past year one of the large windows was cracked during the winter and needed to be replaced.

---

Project Name	Mill and Overlay (Street Repaving)

---

Total Project Cost	\$532,789	Department	Public Works
Type	Unassigned	Category	Unassigned
Priority	n/a	Status	Active

---

### Description

Mill and Overlay Street Repaving

---

### Justification

Several streets are badly in need of mill and overlay similar to what was completed in 2015-2019. Work needs to be done in the next year or two. The longer we wait, the larger the project will get. A phased approach is recommended.

---

Project # 26-POOL-01

Project Name Pool Liner: Patching and Painting

Total Project Cost \$5,000 Contact Public Works Director

Department Pool Type Unassigned

Status Active

### Description

Pool Patching, Resurfacing, and Paint

### Justification

The allocation of \$5,000 for professional pool maintenance is a strategic investment that addresses a persistent and costly issue. Despite diligent efforts by the Public Works department, the pool liner continues to crack and fail each year, requiring significant time and resources for temporary fixes. This recurring problem diverts staff from other essential duties. Allocating funds to a specialized contractor is a more efficient and long-term solution that will free up city staff and provide a more durable repair. The city pool is a valuable community asset, but its age and condition are becoming a major concern. Professional patching and painting will not only address the immediate issues but also extend the useful life of the pool and prevent further deterioration, avoiding the need for a full and significantly more expensive replacement in the near future. A well-maintained pool is essential for public safety and provides a high-quality recreational experience. The recurring cracks can lead to water leaks and potential hazards. By investing in professional services, we can ensure the pool is safe, functional, and aesthetically pleasing for all residents who use it.

Wabasha, MN

Project # 27-PW-01  
Project Name Replace 2007 Plow Truck

Total Project Cost	\$225,000	Department	Public Works
Type	Unassigned	Category	Unassigned
Priority	n/a	Status	Active

### Description

2027 Tandem Plow Truck

### Justification

The existing truck has reached the end of its useful life. At 20 years old by the time of its replacement, it has become increasingly unreliable and prone to mechanical failure. A breakdown during a significant weather event would severely compromise the Public Works department's ability to clear roads, posing a direct threat to public safety and emergency service accessibility. A new, reliable vehicle is essential to ensure consistent and effective winter maintenance operations. The Public Works department has made every effort to extend the truck's operational life through diligent maintenance and repairs. However, these efforts are becoming less effective and more costly as the vehicle's components reach the end of their lifespan. Replacing the truck now is a more fiscally responsible long-term solution that will reduce escalating maintenance expenses and the operational downtime associated with frequent repairs. The existing truck has an estimated trade value of \$50,000.00. Leveraging this asset now provides a significant reduction in the overall cost of a new vehicle. Waiting any longer risks a complete breakdown, which would eliminate this trade value and force the City to bear the full cost of a new truck without this critical offset.

## Capital Improvement Plan

Wabasha, MN

Project # 26-ADMIN-01  
Project Name Server

Total Project Cost \$11,218 Contact City Administrator  
Department Administration Status Active

### Description

Premise Server (AD & Banyan)

### Justification

The City of Wabasha computer server was identified by our IT team as the potential threat to a secure system. The system is old and no longer can be fixed. Should have been replaced in 2023 but due to cost constraints we held off. The server operating system is Server 2012 and has been end of Life for 2 years now. Microsoft is no longer producing patches for the operating system. It is a security risk. The server we use is at HBC and they are no longer our IT provider. The new server would be at the City of Wabasha where On-Site could access it. New server will save \$55 per month on workstation backups.

Project #	LUCAS		
Project Name	Two Lucas Devices		
Total Project Cost	\$39,000	Contact	Ambulance Director
Department	Ambulance	Type	Equipment
Category	Equipment: Miscellaneous	Priority	n/a
Status	Active		

### Description

Two Lucas Devices

### Justification

LUCAS devices are critical pieces of equipment used during CPR. They are essential to providing a high level of care and help immensely since we do not always have additional staff to help in these situations. This is a valuable piece of equipment that provides high quality CPR which not only benefits the patient but also, allows the crew to free up personnel to work on other tasks needed during a high stress situation. Both of our Lucas CPR Devices have reached the end of their life expectancy and are no longer able to be serviced by our PM group and parts are no longer available if they would break. With using the replacement plan provided by the manufacturer we are able to decrease the budget impact by spreading it out over 3 years.
